*NRC - National Regional Component*

*SCF – Small Communities Fund*

## **Background**

- Provincial - Territorial Infrastructure Component (PTIC) is a federal infrastructure program that recognizes and supports the important role that provinces, territories, and municipalities play in helping build Canada's public infrastructure.
- The NWT received a total allocation of \$258 million under the PTIC. Of that, 15% is allocated to community governments:
  - 10% under the Small Communities Fund (SCF); and
  - 5% under the National Regional Component (NRC).
- Community government received an allocation towards which they are asked to identify a project and submit an application. Allocations were determined on a 0.5% base plus a formula top up based on the capital funding formula. The remaining 85% of PTIC-NRC was allocated to the GNWT Department of Transportation.
- NWT community governments will submit SCF project applications to the GNWT through scheduled periodic application intakes.
- The City of Yellowknife has been allocated funding through the NRC and not the SCF. The City will be submitting their project interest and associated Business Plan for the NRC by the end of June 2016.
- Questions on the program or the allocations can be directed to MACA Regional Superintendents.
